

Project Proposal & Resource Requirements

Date:	15 March 2026	Team ID:	PNT2022TMID124356
Project Name:	ANTI DEBT	Lead:	Lakshmi Sravya Kagitha (Team Lead)

Project Overview

Field	Details
Objective	Revolutionize the consumer debt relief process by providing free DTI health metrics, custom Gemini-powered settlement ratios, and professional letters generators.
Scope	A complete full-stack web tool supporting profile edits, CRUD loans, ratios dashboards, AI recommendations log, chat advisor feeds, and reports downloads.

Problem Statement

Field	Details
Description	Delinquent borrowers face high interest rate traps and aggressive collections without access to strategic settlement templates.
Impact	Causes credit score damage, financial anxiety, and lack of structured cash-flow pathways.

Proposed Solution

Field	Details
Approach	Build an AI-powered system analyzing loan data against income files to output stress matrices and draft negotiation templates via Gemini API.
Key Features	DTI calculation, Gemini recommendation parameters, hardship letter generator, advisor chat, PDF and Excel document exports.

Resource Requirements

Resource Type	Description	Specification / Allocation
Hardware: Compute	CPU/GPU configurations for compilation	Local CPU (Minimum 4 cores) / T4 GPU container fallback
Hardware: Memory	System RAM specifications	8 GB RAM (Minimum) / 16 GB (Recommended)
Hardware: Storage	Disk storage for data, logs, and docker images	256 GB SSD (Minimum) / SQLite db file space
Software: Frameworks	Python and JavaScript Frameworks	FastAPI (Backend) / React (Vite Frontend)
Software: Libraries	Imported packages and API connections	ReportLab, OpenPyXL, SQLAlchemy, PyJWT, Recharts, Framer Motion
Software: IDE	Local coding IDE environment	VS Code / Cursor IDE
